English

Hindi

PROFILE

As a dedicated software frontend developer specializing in JavaScript, I bring expertise in crafting dynamic and responsive user interfaces. With a solid foundation in front-end technologies and a keen eye for design, I am adept at translating client requirements into intuitive and engaging web applications. Passionate about creating seamless user experiences, I thrive in collaborative environments where innovation and creativity are valued. My commitment to staying updated with the latest industry trends ensures that I deliver high-quality solutions that meet both user needs and business objectives.

WORK EXPERIENCE

Core Engineer

Metafic   July'2022-Present

NXZSOUND 1.0 :

Led the development of NXZSOUND 1.0, a comprehensive music application enabling users to seamlessly upload songs and videos via both the frontend and admin panel. Key responsibilities included implementing playlist creation features and establishing tiered user authorization levels aligned with subscription models. Additionally, facilitated deal creation functionalities to foster monetization opportunities and partnerships. Leveraging a tech stack encompassing ReactJs, HTML, CSS, Context API, MaterialUI, and Antd, I ensured the delivery of a polished platform for immersive music discovery and consumption experiences.

Roles and Responsibilities:
- Collaborated with client business analysts to gather and comprehend functional requirements, ensuring alignment with project objectives.
- Spearheaded the development and deployment of cutting-edge web applications, prioritizing seamless user experiences and optimal performance.
- Worked extensively with class and functional components, utilizing Context APIs to enhance application functionality and maintain code efficiency.
- Contributed to integrating third-party services including Firebase, Plaid, and Waveform, as well as leveraging Google APIs such as the Location API for enhanced features.
- Successfully managed multiple projects, including WindEverest and BuilderWhiteboard, ensuring client satisfaction and project success.

Software Engineer   September'2021-July'2022

Mernplus Technologies

- Led the development for numerous client projects including JSW, San-Miguel, and GFB, overseeing end-to-end execution and ensuring alignment with project objectives. Additionally, provided support for select clients such as Colgate and Botree, offering assistance and guidance to address their specific needs.

EXPERTISE

- Experienced Applications Developer with over 4 years of expertise spanning the entire development lifecycle. Proficient in Cross-browser HTML, CSS, and JavaScript coding, delivering responsive website layouts tailored for modern browsers and mobile devices.
- Demonstrated proficiency in version control systems like Bitbucket and Git, ensuring efficient collaboration and code management within development teams. Additionally, adept in communication tools such as Slack and Microsoft Teams, facilitating seamless team interactions and project coordination.
- Skilled in meeting tight deadlines and managing multiple tasks concurrently, with a proven track record of delivering high-quality solutions on time. Adaptable to varying work schedules and environments, possessing strong communication skills to effectively collaborate with stakeholders and team members.
- Familiarity with Agile methodology, enabling agile development practices for iterative and collaborative project execution. A team player with a self-motivated attitude, known for quickly grasping new concepts and demonstrating analytical and problem-solving skills. Possesses comprehensive technical expertise and proficient in both written and oral communication.

WORK EXPERIENCE

- Mainly involved in N8N interface development, leveraging plain JavaScript coding to enhance automation processes. Implemented and configured various integrations including Webhook, Redis, Date and Time functionalities, and interfacing with Google Sheets and Excel sheets for data management and manipulation.
- Engaged directly with clients in one-on-one interactions, facilitating discussions on feature requirements and addressing change requests to ensure client satisfaction and project success.
- Furthermore, contributed to frontend UI development, specializing in CSS styling for one client's frontend interface. Additionally, participated in the creation of flowcharts, reports, and roadmaps to guide project progression and enhance client understanding.

Software Developer

Webllisto Technologies Pvt Ltd Indore   April'2021-September'2021

NFT Marketplace :

Led frontend development for an NFT Marketplace project using ReactJs, facilitating seamless user interactions and experiences within a decentralized platform. The NFT marketplace enables users to create, buy, sell, and store non-fungible tokens (NFTs), allowing transactions in cryptocurrency.
Developed the project to operate on both Klaytn and Ethereum networks, ensuring compatibility with multiple blockchain ecosystems.

 The platform is currently live at http://test.hintmembership.com.

Tech Stack: ReactJs, HTML, CSS, NodeJs, Blockchain, react-redux.

Roles and Responsibilities:
- Collaborated with client business analysts to comprehend functional requirements, ensuring alignment with project goals and objectives.
- Led group discussions with managers and team members to strategize design, implementation, and testing approaches for assigned tasks.
- Executed development tasks with a focus on delivering high-quality functional requirements within estimated timelines.
- Took ownership of assigned tasks from development through to release, ensuring smooth project progression and successful deployment.
- Conducted debugging and addressed defects identified by the testing team, ensuring robustness and reliability of the platform.
- Prepared detailed documentation and reports outlining new designs and implementations for team reference and project continuity.

SOFTWARE ENGINEER

WORK EXPERIENCE

Executive Technology   Jan'2021 - Apr'2021

ABSTech Services

AirKYC :

Contributed to AirKYC™, a face recognition-based eKYC solution aimed at digitizing the KYC process, streamlining KYC maintenance, and ensuring compliance with regulatory requirements. Worked extensively on the HR and Admin module of the platform, enhancing functionality and user experience.
The solution is currently live at https://www.airface.in/.

Tech Stack: ReactJs, Material-UI, HTML, CSS3, Python, react-redux.

Roles and Responsibilities:
- Collaborated with client business analysts to gather and comprehend functional requirements, ensuring alignment with project objectives.
- Led group discussions with managers and team members to devise design, implementation, and testing strategies for assigned tasks.
- Developed functional requirements with a focus on quality and adherence to estimated timelines.
- Owned the end-to-end responsibility of assigned tasks, from development through to release.
- Conducted debugging and addressed defects identified by the testing team, ensuring the robustness and reliability of the platform.
- Provided production support to digital and CSR systems, ensuring seamless operation.
- Prepared comprehensive documentation and reports outlining new designs and implementations for team reference.
- Conducted unit testing for all developed WSDL on Soap UI.
- Actively participated in knowledge-sharing sessions to foster team collaboration and skill enhancement.

Intern   DEC '2018 - May '2019

AppStone Pvt Ltd

Worked on Online Music Application as an intern using ReactJs.

SINCERELY,

FARHEEN IDRIS
